Read each word – then write it – then read its definition

Array

---

---

---

An array is a collection of data.

Basic

---

---

---

```
10 print Hello  
20 goto 10
```

A computer language designed in the 1960's.

Button

---

---

---

Item that one clicks which represents a choice to be made.

## CAD

---

---

---

Computer Aided Design (CAD) uses computer graphics instead of a pencil and paper.

## CD-ROM

---

---

---

Compact Disk-Read Only Memory (CD-ROM) is a compact disk used for computer storage.

## Check box

---

---

---

Small box that one clicks which then turns it off and on.

# CPU

---

---

---

Central Processing Unit is a part of the computer where operations are performed.

# Debug

---

---

---

Process to search and remove errors from a computer program.

# Disk

---

---

---

Used with a computer as a data storage device.

## Double-Click

---

---

---

To click a mouse button twice.

## Erase

---

---

---

Delete a file from a disk.

## File

---

---

---

Block of information stored on disk.

# Font

---

---

---

12 The quick brown fox jumps over the lazy dog. 1234567890  
18 The quick brown fox jumps over the lazy dog. 1234567890  
24 The quick brown fox jumps over the lazy dog. 1234567890  
36 The quick brown fox jumps over the lazy dog  
48 The quick brown fox jumps over

Collection of type sizes.

# Icon

---

---

---

A small picture that represents an object.

# Laptop

---

---

---

A small lightweight computer.

# Menu

---

---

---

List of choices that appear on the screen.

# Mouse

---

---

---

Computer device that works by rolling around and pressing buttons.

# Reboot

---

---

---

Restart a computer.

# Save

---

---

---

Transfer data to storage.

# Text box

---

---

---

A text box is used to enter text

Bonus Word 1:

# Monitor

---

---

---

Displays information on a screen.

Bonus Word 2:

Keyboard

---

---

---

Allows text to be typed into the computer.

Bonus Word 3:

Computer

---

---

---

A computer is a machine used to run instructions.

Write out each sentence on the line provided

The array is a collection of data.

A B C

---

---

---

---

---

Basic was created in the 1960's.

```
10 print Hello  
20 goto 10
```

---

---

---

---

---

Clicking the button represents a choice.

Submit

---

---

---

---

---

CAD is used to draw out ideas.

---

---

---

---

---

The CD-ROM is for storage.

---

---

---

---

---

A checkbox can be turned on and off.

---

---

---

---

---

The CPU is where computer operations occur.

---

---

---

---

---

To debug a program removes errors.

---

---

---

---

---

The disk stores data.

---

---

---

---

---

Double click an item twice to run it.

---

---

---

---

---

Erase a file by deleting it.

---

---

---

---

---

The file stores information.

---

---

---

---

---

The font is a collection of type sizes.

The quick brown fox jumps over the lazy dog. 1234567890  
The quick brown fox jumps over the lazy dog. 1234567890  
The quick brown fox jumps over the lazy dog.  
The quick brown fox jumps over

---

---

---

---

---

---

The icon is a small picture on an object.

---

---

---

---

---

---

A laptop is a lightweight computer.

---

---

---

---

---

---

The menu allows one to choose items.

---

---

---

---

---

A mouse is used to click items on a screen.

---

---

---

---

---

A reboot restarts a computer.

---

---

---

---

---

To save data is to store it.

---

---

---

---

---

A text box is used for typing text.

---

---

---

---

---

The monitor displays information on the screen.

---

---

---

---

---

A keyboard is used for typing text.

---

---

---

---

---

The computer is a machine that runs programs.

---

---

---

---

---

Read each compound word – then write it – then read its definition

## Alert Box

---

---

---

Gives message to user in a small window.

## Bar Code

---

---

---

Wide and narrow bars, which a computer reads with a special wand.

## Clip Art

---

---

---

Artwork that can be used quickly.

## Dialog Box

---

---

---

Window that appears to collect data from the user.

## Disk Drive

---

---

---

Allows computer to read and write data on disk.

## Fiber Optics

---

---

---

Cable that carries light made of a thin fiber of glass.

## Hard Disk

---

---

---

Storage for computer files and programs.

## Log On

---

---

---

User ID:

Password:

Enter username and password to gain access to a computer.

## Menu Bar

---

---

---

Menu of items at the top of screen or window.

## Radio Button

---

---

---

R	<input type="radio"/>
A	<input type="radio"/>
D	<input type="radio"/>

Circle to select, only one can be selected at a time.

## Source Code

---

---

---

```
<?xml version="1.0" ?>  
- <abc>  
  <person>Dylan</person>  
  <age>7</age>  
  <person>Maura</person>  
  <age>3</age>  
</abc>
```

Computer language code.

## Text Box

---

---

---

Here is the textbox	<input type="text"/>
---------------------	----------------------

Area user types or edits text in.

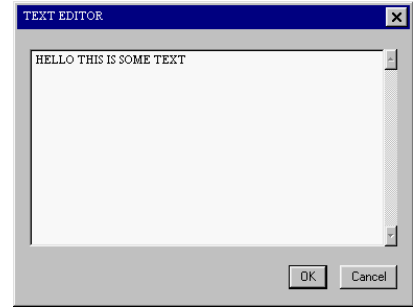

## Text Editor

---

---

---

Program that handles text and allows text to be saved, opened, edited and deleted.

## Title Bar

---

---

---

Label at top of a window.

## Word Wrap

---

---

---

Occurs when the end of a line is reached, the text automatically jumps to the next line.

# JavaScript

---

---

---

JavaScript is a scripting language that is used on web pages to create items.

```
<script language="JavaScript">  
    window.alert ("Hello");  
</script>
```

---

---

---

---

---

---

# XML

---

---

---

```
<?xml version="1.0" ?>  
- <pet>  
    <name>Dog</name>  
    <age>10</age>  
</pet>
```

The Extensible Mark-up Language is a scripting language that is used to define items.

```
<?xml version="1.0"?>  
<pet>  
    <name>Dog</name>  
    <age>10</age>  
</pet>
```

---

---

---

# Java

Hello, World!

Java is a programming language that is used to create interactive programs.

```
public class Hello
//Java Hello Example
{
    public static void main(String[] args)
    {
        System.out.println("Hello, World!");
    }
}
```

# C

Hello World

C is a programming language that is used for general computer programs - it was created in the 1970's.

```
#include <stdio.h>
/* Prints Hello World */
main()
    {
        printf("Hello World\n");
    }
```

## Biography

Kevin O'Neill was born in Poughkeepsie, NY in 1972. He has a MSCS in computer science and information systems and BA in journalism with a minor in music from Marist College located in Poughkeepsie, NY.

His interest in computer programming started at an early age of 8 when his parents bought him an Apple IIe computer. From that moment on – he was hooked. Mr. O'Neill started writing and studying BASIC and LOGO programs on his Apple IIe and eventually as time went on he has learned more programming languages such as APL, ASP, C, C#, C++, DHTML, HTML, Java, JavaScript, Jam, Visual Basic, XML and WML.

Mr O'Neill is married and has a son and daughter. They reside in Canonsburg, PA.

Besides writing and computer programming he enjoys playing guitar, piano, painting and spending time with his family.
