

## **Goggle Mini – not sorting in IE:**

Using a Google Mini to return search content – I added the following string at the end of the passed in query string so that items would be sorted most recent:

```
&sort=date:D:S:d1&filter=0
```

This worked for all browsers it appears but IE:

Thus, the solution would up being to pass in the query string as such:

```
&sort=date%3AD%3AS%3Ad1
```

Thus my search string when done looked like the following:

```
search?q=test&site=default_collection&client=kmo_frontend&proxystylesheet=kmo_frontend&output=xml_no_dtd&ie=UTF-8&oe=UTF-8&sort=date%3AD%3AS%3Ad1
```

Having used the Google mini since about 2006 – this was the first time I can recall that an item I passed in the query string didn't work in all browsers.
