## **Management System - MUSCLE**

---

Utilizing a proper management system is efficient for business.

A proper management system includes:

**Management information system** - utilizing technology properly

**Understand technology** to meet the full ecosystem of the organization

**Strategy** - a management system includes one very being strategic in what the system will output

**Clarify a good manager** classifies the management system being put in place

**Long term** - a management system should have the long term in mind

**Execution** - a management system should utilize a good execution system so its value is obtained
